## ➤ ABOUT US

EzyStrut was founded in Adelaide, South Australia in the early 1980's and manufactures, markets and distributes cable and pipe support systems.

Today, a division of the publicly listed company Korvest Ltd, EzyStrut has grown across Australia and the Asia Pacific Rim to become Australia's largest and most highly regarded cable and pipe support manufacturer. This growth was achieved through unmatched quality in both the range of products and the service we provide.

We are ISO:9001, ISO:180001 and ISO:14001 certified.

## ➤ TWO SPECIALIST DIVISIONS

Together with Korvest Galvanisers, EzyStrut produces a range of standard, as well as customised and innovative products. These business units work together to develop an integrated, complete solution quickly, finished to Australian and International Standards.

## ➤ HEAD OFFICE

The company's manufacturing plant, head office, distribution centre and engineering department are all based in Kilburn, South Australia, conveniently located 10km from the Adelaide CBD and Port Adelaide.

## ➤ ACROSS AUSTRALIA AND INTERNATIONAL

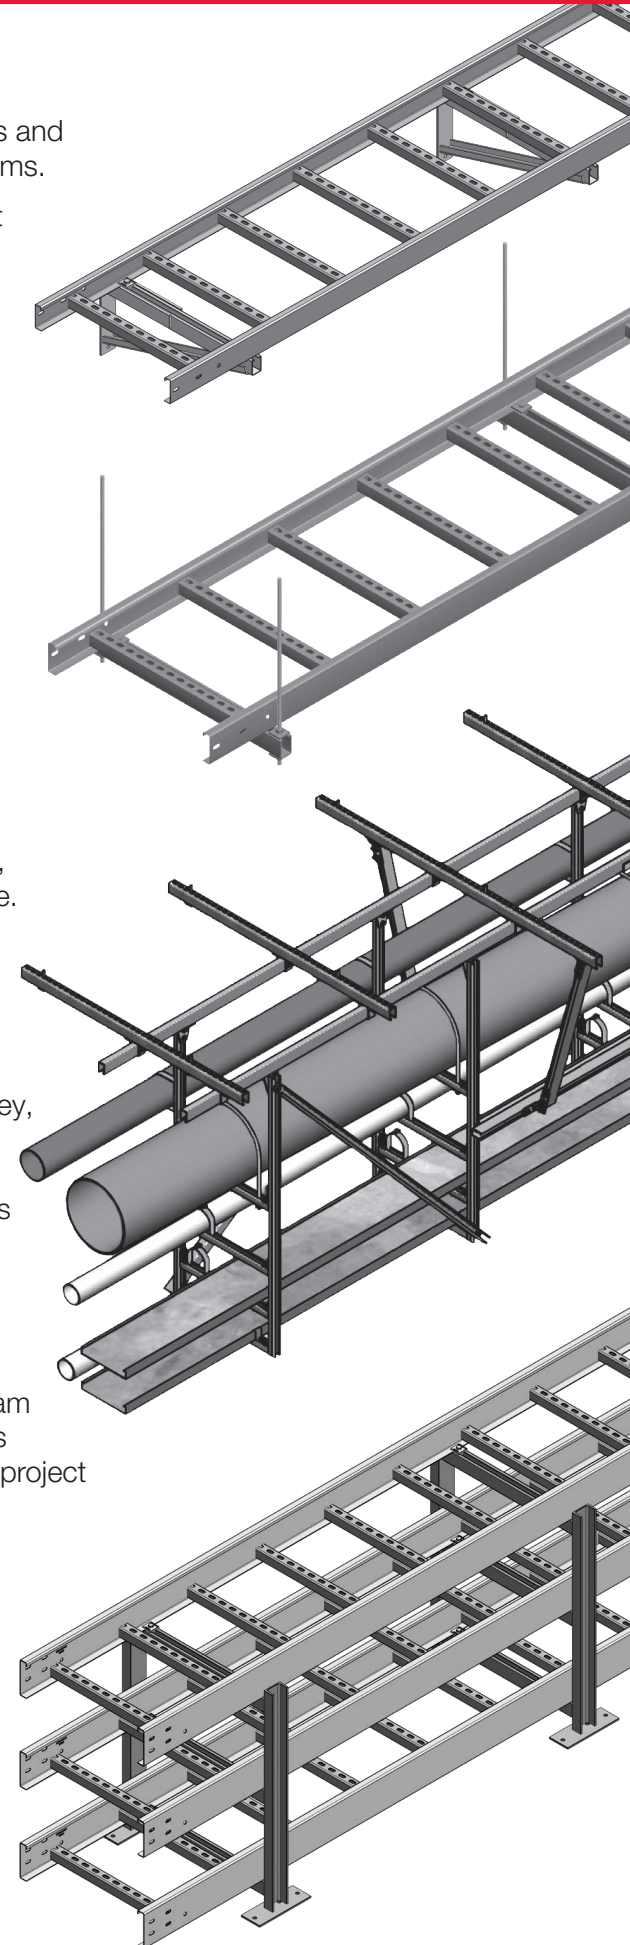

Nationally, Korvest has offices located in Adelaide, Melbourne, Sydney, Brisbane and Perth, with distributors in Darwin, Townsville, Hobart, as well as New Zealand. National transport is achieved easily with Korvest's existing network, or we can provide ex-works availability as required.

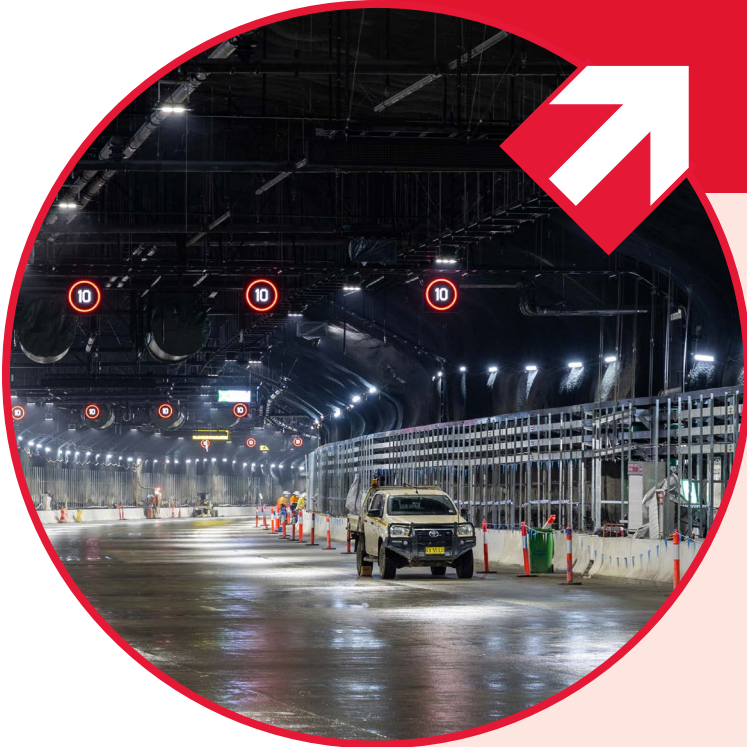

## ➤ OUR PEOPLE

Our workforce is multi-skilled, and lead by a central management team able to adapt to sudden changes in demand and customer needs as they happen. We have the capacity to scale up production should a project require more hands or hours to meet strict deadlines.

## ➤ OUR PRODUCTS

EzyStrut is the only major cable support company to manufacture products 'in house' in Australia, producing the most diverse range of cable and support solutions in the industry, suitable for virtually any application and in the customer's required surface finish. A contributing factor to EzyStrut's continued success is the ability to deliver customised cable and pipe support solutions at competitive prices. Through a commitment to product quality and exceptional value, combined with superior customer service and reliability, EzyStrut is frequently the chosen partner on major projects.

## WESTCONNEX M4-M5 LINK

- Located in Sydney
- 7.5km twin road tunnels
- 20,000 lengths of cable ladder
- Fire rated and seismic compliant
- Specially engineered and independently tested solutions
- Custom designed H-frames, wall brackets and signal mounts

## AIRPORT LINK M7

- Located in Brisbane
- 6.7km road tunnel
- 2,500 lengths of cable ladder
- First cable support system installed in Australia to meet the AS/NZS3013:2005 standards for fire rating
- Powdercoated black throughout

## METRO NORTH-WEST

- Located in Sydney
- 15.5km rail tunnel
- 2,000 lengths of cable ladder supplied in various sizes
- Custom engineered and independently tested cantilever brackets, used to install lighting and signalling systems

## CROSS RIVER RAIL

- Located in Brisbane
- 5.9km twin rail tunnels
- Multi-tiered cable ladder installations throughout
- Fire rated and seismic compliant
- Custom designed wall brackets and frame products for confined and high-traffic spaces

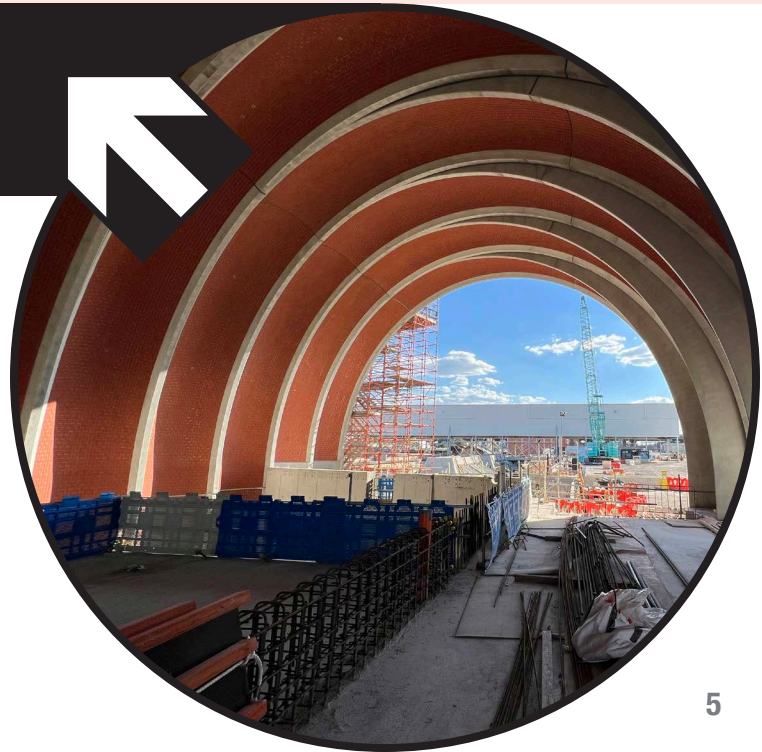

## WESTCONNEX M8

- Located in Sydney
- 102km of cable ladder in various widths and designs
- 105 customised product solutions
- Four-tier framework concealed behind architectural features
- CCTV, signage, speed limit and public address system brackets

## METRO TUNNEL

- Located in Melbourne
- Supplied four major contractors for various portions of the project
- Off-the-shelf product as well as custom designed solutions
- Specially manufactured trapeze, leaky feeder and cockatoo brackets
- Fire rated and seismic compliant

## ➤ DESIGN

EzyStrut continues to invest countless hours in the development and ongoing improvement of our cable and pipe support systems. Using the latest programs in design technology, new products can be prototyped through virtual modelling before commercial fabrication. A complete library of workshop and technical drawings is made available for integration into client construction designs.

## ➤ ENGINEERING

Korvest Engineering has extensive experience in designing cable support systems for road and train tunnels. We have provided innovative and bespoke product solutions that meet the customer's specifications and performance requirements while minimising overall installation time and effort. Our experience includes designing cable support systems to 450°C, WS5X classification to AS/NZS3013:2005, and seismic restraint to AS1170.4. We can also work to the customer's design. Korvest Engineering works directly with customer's engineering team in order to ensure design objectives are met economically and efficiently.

## ➤ QUALITY

Ezystrut is committed towards quality at all levels within the organisation, and works and complies to requirements of ISO 9001:2015 quality management systems. EzyStrut is ready and able to provide project specific quality control procedures and manuals to suit the most demanding project requirements. Our proven performance has been demonstrated through partnerships formed with many of the largest engineering and construction companies, responsible for building many of the highest profile projects across all sectors of industry.

## ➤ MANUFACTURING

EzyStrut manufactures one of the most diverse range of cable and pipe support products in industry, suitable for virtually all applications. Our manufacturing facilities include a broad range of advanced manufacturing equipment capable of producing almost any engineered product efficiently and accurately, as well as one of the largest Hot Dip Galvanising facilities in Australia.

Using only prime quality materials and manufactured to recognised standards, EzyStrut can respond to all industry demands. Our flexible approach toward production planning, rotating shift management and a multi skilled workforce has seen us meet the challenges of the largest projects.

## ➤ PROJECT MANAGEMENT

To ensure that the project runs on time and the status is continually communicated effectively to all stakeholders, EzyStrut will assign a specific Project Manager to the project. The Project Manager's role will be to ensure that any likely capacity constraints are highlighted early, and increased production capacity strategies are actioned to remain on schedule. EzyStrut will ensure that it's supplier base is aware of the importance of delivery on time with continual support and management of our supplier base to perform to schedule. The project manager's role will also be to ensure that quality checks are completed and distribution of that information is communicated effectively, with product distribution continually monitored for conformance to customer requirements.

EzyStrut will develop an execution plan across the entire project, as information is made available on the required delivery schedule by the customer. A manufacturing and distribution schedule will be available to view at any time, measuring EzyStrut's project forecast to actual supply. If the plan's actual supply deviates from the forecast, EzyStrut will develop and make available a recovery plan to ensure that the project is brought back inline with the forecast.

## ➤ DISTRIBUTION

Whether it is around the corner, or the other side of the world, EzyStrut can cater to all the logistical needs of your next project. Export packaging, documentation, customs and clearance can be managed under our control. EzyStrut continues to set the industry benchmark for supply and reliability.

## ➤ WE DELIVER ON OUR PROMISE

EzyStrut has built an enviable reputation within the industry by delivering projects on time and within budget. These simple words have become the cornerstone to our success, by providing the level of service and reliability needed in today's market.
